1. To redefine the 19,100' Tuscaloosa Sand, Reservoir A, insofar as the 19100 TUSC RA SUU is concerned, as being that gas and condensate bearing sand encountered between the depths of 18,330 feet and 20,500 feet on the Schlumberger DIL - Sonic Log of the Chevron U.S.A. BP further requests a tolerance of no closer than 330 feet from the nearest unit line for the proposed substitute unit well to account for the possible variance between the proposed location and the "as drilled" location.
4. To find that the proposed substitute unit well is necessary to efficiently and economically drain a portion of the reservoir covered by the unit which cannot be so drained by any existing well within such unit.
5. Except to the extent contrary herewith, to continue in full force and effect the provisions of 1075-A Series of Office of Conservation Orders, the units created thereby, and applicable Statewide Orders.
6. To consider such other matters as may be pertinent.
